

Raw SQL Query Chart

◆ Basic Table Queries

Operation	SQL Query
Create Database	CREATE DATABASE dbname;
Use Database (MySQL)	USE dbname;
Create Table	CREATE TABLE users (id INT PRIMARY KEY, name VARCHAR(100));
Drop Table	DROP TABLE users;
Show Tables	SHOW TABLES; or \dt (PostgreSQL)
Describe Table	DESCRIBE users; or \d users (PostgreSQL)

◆ Insert Data

Operation	SQL Query
Insert a row	INSERT INTO users (name, email) VALUES ('Satish', 'satish@mail.com');
Insert multiple rows	INSERT INTO users (name, email) VALUES ('A', 'a@mail.com'), ('B', 'b@mail.com');

◆ Read Data

Operation	SQL Query
Select all	SELECT * FROM users;
Select specific columns	SELECT name, email FROM users;
Where condition	SELECT * FROM users WHERE id = 1;
Limit	SELECT * FROM users LIMIT 5;
Order By	SELECT * FROM users ORDER BY name ASC;
Like / Pattern Matching	SELECT * FROM users WHERE name LIKE '%s%';

◆ Update Data

Operation	SQL Query
-----------	-----------

Update a row	UPDATE users SET name = 'Satish Kumar' WHERE id = 1;
--------------	--

◆ Delete Data

Operation	SQL Query
-----------	-----------

Delete a row	DELETE FROM users WHERE id = 1;
--------------	---------------------------------

Delete all rows	DELETE FROM users;
-----------------	--------------------

Truncate (reset table)	TRUNCATE TABLE users; (Not in SQLite)
------------------------	---------------------------------------

◆ Joins

Join Type	SQL Query
-----------	-----------

Inner Join	SELECT users.name, blogs.title FROM users INNER JOIN blogs ON users.id = blogs.author_id;
------------	---

Left Join	SELECT * FROM users LEFT JOIN blogs ON users.id = blogs.author_id;
-----------	--

Right Join	SELECT * FROM users RIGHT JOIN blogs ON users.id = blogs.author_id; (not in SQLite)
------------	---

◆ Other

Operation	SQL Query
-----------	-----------

Count rows	SELECT COUNT(*) FROM users;
------------	-----------------------------

Rename table	ALTER TABLE users RENAME TO members;
--------------	--------------------------------------

Add column	ALTER TABLE users ADD COLUMN age INT;
------------	---------------------------------------

Drop column	ALTER TABLE users DROP COLUMN age; (Not in SQLite)
-------------	--
